
SUMMARY

Aspiring Data Analyst with first-hand experience analysing point-of-sale data to support operational decision-making, including improving stock preparation efficiency by 25%. Self-taught in core data analytics and data storytelling concepts, with the ability to communicate insights clearly to non-technical stakeholders. Strong interest in data-driven operations, maintaining accurate stock information, and supporting management teams with reliable operational data. Currently completing a Graduate Certificate in Data Analytics and actively developing practical skills through online data science competitions.
